Westernacher

INTEL LIGENT

SHIP PING

Westernacher eXpress: the SAP solution with all logistical core functionalities for seamless integration with your transport partners. The tool for SAP EWM, ERP and TM.

eXpress

eXpress

Everything you need to know about your carriers: eXpress has it all.

Courier, Express or parcel service - each has its own specifications. Rules for dimensions, weight, costs and services differ for each provider. There is no uniform standard.

With eXpress by Westernacher, this won't be an issue, as the tool will regulate everything for you.

___

eXpress brings the carriers to the system

This makes order management with the carriers very easy. eXpress brings the carriers to your SAP system - ERP, EWM or TM. That means you do not need any external software, no other user interface. Carrier management takes place in your usual SAP system. Fully integrated.

eXpress speaks for you

and with the carriers. The data for parcels, pallets etc, which you have created in your SAP system, is sent to your carrier via the Internet and you get back the carrier's own label within seconds to your printer

eXpress knows where your goods are

With eXpress you can also get track and trace information on your screen. Know where your parcels or pallets are. You can recognize runners or an undelivered parcels and react early at your own printer

eXpress puts pressure

eXpress prints the labels according to the individual requirements of each carrier in the printer language ZPL. That means speed and quality.

eXpress Cockpit

Control everything from here.

- The eXpress Cockpit defines all master data such as storage locations, warehouse customers, carriers, carrier products, services, label templates, and so on.

- All shipping objects such as parcels, pallets and containers for which labels are printed, are part of the company overview.

- Individual process steps are logged and information is offered in the respective context.

- Tracking information on shipments is automatically retrieved and stored for further analysis.

- Common carriers and their products and web services are already defined in the cockpit.

- You can simply add more carriers.

360 Grad

We are the IT experts with business know-how. Take advantage of our 360 degree view.

We are a team of more than 600 experts worldwide, with proven knowledge and decades of experience in building IT structures. At the same time, we always have the essentials in view: your business. Anyone working with Westernacher feels that business and IT know-how come together here. This is how we ensure that your project achieves success quickly.

All business processes in a company are interlinked - isolated views or standalone solutions are a no-go. In contrast, we set our approach to see the whole picture and to shape this with you. We call this the end-to-end approach.
