

SAP EWM Time-to-Value Solutions.

Not having to order the whole menu at the restaurant.

Not having to take all the classes at the gym.

Nice, isn't it? And actually self-evident.

That's exactly how modern warehouse management software should work, we thought, and developed SAP EWM Time to Value Solutions.

This means: SAP EWM with a clearly defined scope and budget.

With everything you need to run your warehouse. Fully implemented, from project start to go-live and hyper-care, in less than 12 weeks.

How does that work? It's simple: we have SAP EWM preconfigured.

Just right for companies without overly complex processes in their warehouse.

The solution "Manufacturing Warehouse", the solution "Distribution Center" and the hybrid packaged solution if you need both.

Enter the future of warehouse management now.

If you already use SAP in other areas of your business, you benefit additionally from the seamless integration of SAP EWM and connect your warehouse with your sales department, production line and shipping facilities easily.

You can scale or expand at any time.

You have SAP EWM now. And complete flexibility for new requirements and ideas in the future.

Get started with SAP EWM now.

With the Digital Supply Chain experts from Westernacher.
