Get your yard organized with We check-in for SAP Yard Logistics.

Welcome to the yard. To speed up your arrival processes, Westernacher's We check-in, based on SAP Yard Logistics, gives you full visibility into your gates in processes to make the arrival of vehicles onsite smoother.

We check-in will guide you through registration and provide all the necessary information about carriers, freight and safety to clear the truck in seconds.

The check-in process is done by asking simple questions and giving visualized instructions. To facilitate driver communication, the app is available in 13 languages.

Increase your gate throughput significantly using terminals or mobile devices.

Make your gate agent's life easier by providing a streamlined and easy-to-use application.

We check-in kicks off the yard process by assigning parking spots and gates. This helps to manage peak period demand.

Get your yard organized with Westernacher's We check-in.

Your yard can do more.
